

Checklist for Making Audio Work Samples for the MI Training Study

- Adult client/patient (at least 18 years old)
- Currently being treated for substance use disorder
- The recording should be of the first or second *therapy* session (Please do not send recordings of assessment sessions.)
- The tape is at least 40 minutes long. Partial interviews with different clients *cannot* be combined. The recording must be continuous and *cannot* be edited
- Are both the clinician and client clearly audible?** Please do NOT use voice activated option, as it interferes with timing coding.
- Standard size audio cassette (not micro) or audio file using digital recorder
- Return three forms with each recording:**
 - **Clinician certification of client's consent**
 - **Session Report Form**
 - **Working Alliance Inventory**
- Keep client's signed consent in your files. Do not send to research project, as the client's name should not be known to researchers.
- Send within 2 weeks of recording the interview.
