Research Funding

Submitted:

1) Centers of Biomedical Research Excellence (COBRE) (Pilot Project PI: Moyers) Submitted May 25, 2020 through The MIND Research Network; University of New Mexico

National Institute of General Medical Sciences (NIH)

Investigating Biomarkers for Therapeutic Empathy, total costs \$50,000.

This project investigates the association between clinician empathy and neural networks involving the right anterior insula, right anterior cingulate cortex, ventromedial prefrontal cortex and the right temporo-parietal junction. Involves MEG scanning for frontline therapists involved in therapeutic tasks relevant to psychosocial treatments, particular those for substance misuse.

Status: Currently funded

3) 1K23AA027777-01 (PI: Hurlocker) Submitted February, 2020. (Under review)

National Institute of Alcohol Abuse and Alcoholism

Adapting Intake Procedures to Improve Treatment Delivery in Addiction Treatment. Total costs: \$969, 624. 00 Role: K23 Mentor

4) R34 AA028344 (PI: Hurlocker) Re-submitted February 2020. (Under review)

Developing a Brief Motivational Intervention for Anxiety-Focused Drinking in Young Adults. Total costs: \$681, 750.00. Role: Mentor

Status: First submission, scored (40); Resubmitted February, 2020

Current:

5) 1UF1MN121949 (MPIs: Debar, Bradley) 2019 - 2024

National Institute of Mental Health

Patient-Centered Team-Based Primary Care to Treat Opioid Use Disorder, Depression, and Other Conditions, \$12,769,318.00 Role: Consultant, MI Training and Quality

Dr. Moyers oversees training and quality monitoring for motivational interviewing used to engage patients with opioid use disorders via telephonic intervention.

Completed:

6) UNIVERSITY OF SOUTHERN DENMARK (PI: Moyers) 2013 - 2016

Project ELDERLY: An international multicenter study for treatment of alcohol problems in the elderly Subaward from University of Southern Denmark. Role: Co-Investigator

Dr. Moyers served as the Quality Control Coordinator for the Community Reinforcement Approach for Seniors (CRAS) intervention. Dr. Moyers oversaw objective behavioral coding of therapist adherence across three countries (Denmark, Germany, United States) with acceptable levels of interrater reliability.

7) R01 DA 021227-01 (PI: Moyers) 2007 - 2012

National Institute on Drug Abuse

Testing Theory-based Training in Motivational Interviewing

This project examined a specific hypothesized mechanism of change with motivational interviewing (client language about change) by means of a randomized, controlled trial to investigate whether: 1) clinicians could be differentially trained to attend to client language during MI sessions and 2) whether the use of such strategies produced different levels of client change talk across training conditions.

8) R01 AA 13696 (PI: Moyers) 2002 - 2007

National Institute on Alcohol Abuse and Alcoholism

How Does Motivational Interviewing Reduce Alcohol Abuse?

This project investigated a specific causal mechanism for motivational interviewing: client language about change. Session tapes from the MET condition in Project MATCH (n = 248) were evaluated using a sequential coding system for therapist behaviors and client in-session speech. These variables were compared to client drinking outcomes.

9) DAMD17-01-1-0681 (PI: Moyers) 2001 - 2007

Dept. of the Army

Motivational Interviewing in the Prevention of Alcohol Abuse

This was a randomized, controlled trial to investigate optimal strategies for teaching motivational interviewing to frontline behavioral health providers in the Air Force. Workshop training was augmented with personalized feedback, expert consultation or no additional enrichment.

10) R01 DA 13801 (PI: Miller) 1999 - 2003

National Institute on Drug Abuse

Evaluating Methods for Motivational Enhancement Training

This was a randomized, controlled trial comparing workshop training alone with three different types of enrichment for training healthcare providers in MI. Dr. Moyers was responsible for coding of work samples for client language. Role: Co-Investigator

11) U10-AA-11716 (PI: Miller) 2000 - 2003

National Institute of Alcoholism and Alcohol Abuse

Subcontract for Quality Control of Combined Behavioral Intervention: COMBINE Research Project. Dr. Moyers had oversight for training and monitoring CBI therapists as well as process coding of therapy sessions.
