1 Very Low	0-9	0-10	0-1	1	0-1	0	0-2	0-3	0	0	0-1	0
RAW SCORES:												

PROFILE INSTRUCTIONS: From the SIP Scoring Form transfer the total scale scores into the empty boxes at the bottom of the Profile Sheet. Then for each scale, CIRCLE the same value above it to determine the decile range.

These interpretive ranges are based on a sample of 1,389 men and 342 women presenting for treatment.. Individual scores are therefore being ranked as low, medium, or high relative to adults already presenting for treatment. The normative data are from Project MATCH, a multisite clinical sample. For details of study design see:

Project MATCH Research Group (1993). Rationale and methods for a multisite clinical trial matching patients to alcoholism treatment. *Alcoholism: Clinical and Experimental Research*, 17, 1130-1145.
